

FROM THE DESK OF GENERAL SECRETARY

Dear brothers,

Rumours are being spread by some members of the sister association that ADTEA representative did not attend Cadre Review Committee's meetings and our association is not serious about the issue, which is totally wrong and misconceived. As a matter of fact, our association was under protest due to the callous and indifferent attitude of officers involved. In reality, the leaders of the other association had entered into a secret agreement if they sign the retrograde recommendations of CRC, they would be promoted to the post of AEs.

Earlier, the leaders of the sister association had submitted a wrong proposal before Cadre Review Committee and on realizing their mistake, they were demanding it back & when the authorities did not return their representation, they withdrew their proposal from their website.

Even before that when they could not send their views/suggestions to the 7th CPC on or before 31-07-2014(last date), they made all sorts of false excuses and are still trying to cover up their inaction and inertia. Ultimately, they needed help of ADTEA and other associations to send a letter dated 24/04/15 for consideration of the employees of AIR & Doordarshan within the purview of the 7th CPC. They were ignorant of the fact that our proposal was already considered by the 7th CPC by assigning ID No. CPC L 000651 to our association and 7th CPC had already taken a decision to consider subordinate engineering cadres within its purview due to our representations forwarded by MIB and DoPT to 7th CPC.

Further, they floated another rumour that "One Cadre One Pay" decision would be generalized only on the members of their association. You, just imagine, is it ever possible? Can our department implement the decision of

court case only on their members leaving aside those EAs who are our members?

So-called leaders of the largest association have conceded their defeat by not accepting our challenge for open competition on drafting skills. Such leaders have acquired power and control over their association by adopting questionable means by side tracking their front row capable leaders. Now, being unable to run the show, they are defaming others to hide their incapability. If we throw stone on the mud, we are likely to get our own clothes dirty.

It is high time that the other association's leaders should shed their personal ego, vanity and arrogance and apologise for their earlier conduct of indulging in negative publicity against our association on the Facebook, Whats'App and Website in larger interest of our fraternity. In such a situation, we will also forget our differences and pardon them, otherwise they cannot get any achievement without our active help and man power.

We have expressed complete disagreement with the retrograde recommendations of the Cadre Review Committee on 01/06/2015.
